E.MA Internship Programme

The **E.MA Internship Programme** provides a valuable career building opportunity to the 15 students who have achieved the best results during the preceding academic year: a 5-month internship in an international organisation active in the area of human rights and democratisation. Interns work diligently with skilled and dedicated supervisors, thus gaining first-hand valuable experience and enjoying an opportunity to immediately put into practice the knowledge acquired through studies. The internship programme has been a key factor in facilitating access to the job market for E.MA graduates. It has also contributed to creating a powerful alumni network that has become instrumental in promoting interaction between different institutions.
